

In our topic book we created a graph plotting the weather in Oslo (Norway) and compared it to Gloucester (England). We noticed that Gloucester was warmer than Oslo.

We also went to the onyx building several times to sing jolly Christmas carols including Band Aid's 'Do They Know it's Christmas Time?' (Mrs Day-Webb's favourite). Some children were so good they were chosen to sing Christmas carols at Cavendish Care home! We were lucky enough to get chocolate!

In English, we completed our non-chronological report on a Scandinavian country. Did you know that Lego originates from Denmark?

In Maths, we estimated calculated the area and perimeter of shapes before using the squares in our books to estimate the area of irregular shapes.

In Guided Reading, we have been studying the text 'The Cat Who Walked Himself' by Rudyard Kipling and a non-fiction text about lightning. Did you know that there are different types of lightning?

Probably, the most fun lesson was the Viking PowerPoint. We had to plan and then create Viking powerpoint. When these are all completed we will publish them on eschools.

In Art, we have started to create a picture of Robinswood Hill. When finished, it will be made up of 30 - 36 separate tiles.

So far we have used fabric paints and pastels. The next step is to add fabric and stitch on detail.

Finally, we have been working on our language skills. En las clases de español hemos escrito conversaciones.
