

Year 3 have worked extremely hard as we head towards the holidays.

In Maths we have continued to develop our addition and subtraction skills, adding and subtracting 2 and 3 digit numbers together, spotting patterns and identifying the ones, tens and hundreds. We have also developed our skill of carrying or exchanging from the correct column.

In English, we have completed our fairy tale unit, where we used the story of The Matchstick Girl to base our innovation on, some excellent vocabulary has been added to our writing and by using our own ideas we have enhanced our writing skills. We have completed a short unit on Poetry where we have written our own 'Who am I?' riddles based on Gloucester and Pakistan and landmarks we have learned about.

In Science we have completed our Plants unit and an elicitation on our next unit of Animals and Humans.

Geography has seen us develop our understanding on how rivers are formed, how the river bed is made up and the materials you often find on the river bed. We even carried out our own riverbed experiment to see what happens to the water when rocks and sand are added.

DT has seen us start planning for our Pakistan truck art, where we have added our own designs to a template, which we will make after the holidays.

In History we have looked at past events within Gloucester, including the Siege of Gloucester and how it impacted on our city.

Year 3 loved taking part in the Daily Mile celebrations, where we ran around the field and playground twice and just missing the rain!

We hope you all have a restful break and the children come back ready to learn for the next term.

What we are learning next

In English we will move onto Non-Chronological reports based on our theme.

In Maths we will be moving onto our Multiplication unit, where we will multiply 2 digit numbers together.
