

Year 3 have been working extremely hard in the final weeks of term.

We have had great fun creating our Pakistan inspired truck art, where we have painted our designs and also attempted to make them move by adding a gear system. We plan to display and demonstrate how they move at our parent celebration event on Tuesday 17th December, from 3.30.

In Maths we have completed the first part of the multiplying and dividing by 4 and 8. We have also completed our end of term Maths testing.

In English we have completed our letters unit, where we wrote letters to Imran Khan, the Pakistan Prime Minister encouraging him to visit Gloucester and listing what he could see when here. We have moved onto a persuasive text as we persuade someone to visit Pakistan, using what we have learnt and including it in the text.

In Science we have begun our How, What, Why investigating and we have linked it to our truck art, thinking about the forces that we have to use to make our truck move. We also created skeletons and labelled them with the names of the main bones in our body.

In Art we have completed our Matchstick Factory front covers, we all visit the factory to see the iconic logo for ourselves, we then used charcoal when back in class to enhance our impressive sketches.

In RE we have continued our Islam unit as we have learnt about the 5 pillars of Islam; it was good to use our understanding from our recent trip to be able to explain the pillars and their meaning.

We have also completed our PE Gymnastic unit where we had an intra house tournament, where we demonstrated the skills that we have learnt.

We wish everyone a peaceful and happy Christmas and look forward to learning more next term!

What we are learning next

We will be moving onto our Rotten Romans theme in January, where we will learn about the Romans, who they were and how their empire grew.

In Maths we will continue learning about multiplication as we multiply numbers together in a formal layout.
